

ABSTRACT OF THE DISCLOSURE

METHOD AND SYSTEM FOR AUTOMATIC LDAP REMOVAL OF
5 REVOKED X.509 DIGITAL CERTIFICATES

10 A method, system, apparatus, and computer program product are presented for managing digital certificates. When a certificate revocation list is received at a receiving application, a certificate management application removes any digital certificates that are listed within the certificate revocation list from the LDAP (Lightweight Directory Access Protocol) directories into which the certificates were published.
